

We Firmly Believe

Vaccine Policy Statement

We firmly believe in the effectiveness of vaccines to prevent serious illness and to save lives.

We firmly believe in the safety of our vaccines.

We firmly believe that all children and young adults should receive all of the recommended vaccines according to the schedule published by the Centers for Disease Control and the American Academy of Pediatrics.

We firmly believe based on all available literature, evidence and current studies vaccines are not linked to autism or other developmental disabilities.

We firmly believe that vaccinating children and young adults may be the single most important health-promoting intervention we perform as health care providers, and that you can perform as parents/caregivers. The recommended vaccines and their schedule given are the results of years and years of scientific study and data-gathering on millions of children by thousands of our brightest scientists and physicians.

Copies of the full statement of our beliefs regarding critical importance of vaccinations are available at Super Shot clinics or on our website at: www.supershot.org.
